

CHG 520 5-Unit Drop-In Battery Charger

USER MANUAL

CHG 520 Front and Rear View

Setup Instructions

1. Plug the DC power connector into the rear of the CHG 520.
2. Plug the power supply into an AC wall outlet.
3. Insert the Receiver into the charging slot. The receivers must be facing forward to make contact with the charging contacts. The LED indicator on top of the IR RX20 receiver will illuminate red when charging and will change to green when charging is complete.
4. It is safe to leave the receivers in the charger even after the batteries are fully charged. However, we do not recommend leaving receivers in the charger for a prolonged period of time.
5. A piggy-back cable is available, which can be used to connect up to three CHG 520 chargers to one TFP 043 power supply.

If No LED's Light Up:

1. Verify that the power supply is plugged into a wall outlet.
2. Verify the wall outlet has power (no tripped circuit breaker, etc).
3. Verify the receiver is turned off.
4. Verify that all receivers are facing front in the charger. If charging, the indicator LED will illuminate red. If fully charged, it should illuminate green.
